The Conference Solutions Experts

- + Physical, remote & hybrid meetings
- + Crisp, clear audio
- + Airtight privacy & security
- + Maximised audience involvement
- + Interpretation solutions

For over 30 years, duvall has been a trusted partner to national and international governments, institutions, businesses, and NGOs.

We help organizations run meetings more effectively and efficiently.

Whether you're organizing a meeting, conference, or event, duvall offers a unique combination of equipment and expert support to ensure everything runs smoothly. We are the only provider with a complete range of solutions for both onsite and online settings.

Enhance the quality and impact of your meetings with duvall's solutions and expertise.

duvall

FROM LOCAL COUNCILS TO GLOBAL SUMMITS - WE'VE GOT YOU COVERED

Thanks to an extensive equipment portfolio and our network of partners, duvall is able to organise every aspect of your event.

Our conference systems bring order and structure to a meeting. They lower the threshold for active participation. A push of a button is enough to start a discussion. Automatic camera control ensures that the speaker is visible to all participants, both on site and online.

Together with qualified interpreters, duvall's technology ensures that all participants can follow the meeting in their own language with simultaneous interpretation. And when they speak, they can bring their message across in their own language.

Make everyone feel welcome. Ensure maximum active participation.

Want to know more about your participants?

Our interactive voting system provide quick results and increase attendee engagement.

AV & Conference Solutions

Structured, reliable communication for any setting

Clear Sound in Every Space

From council chambers to international summits, our conference microphone systems deliver consistent, high-quality audio that keeps discussions clear and focused. Each participant has their own microphone, speaker, and request-to-speak button, allowing for natural, interruption-free dialogue.

Modular and Fully Integrated

Our setups combine seamlessly with interpretation, voting, recording, and streaming solutions. This modularity ensures that your event stays structured, inclusive, and fully connected.

Setup and Support Included

We take care of installation and configuration, with our technicians present during your event for full support. You focus on your content – we handle the technology.

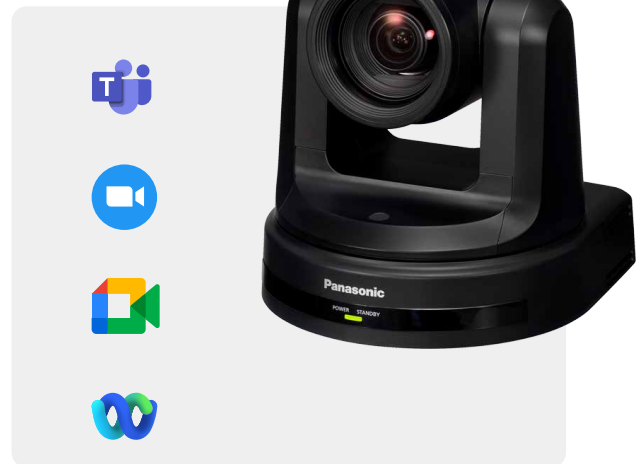

TELEVIC CONFIDEA G4 FLEX

All-in-one wireless tabletop conference unit with an integrated 5.2" touch screen.

Capture, Stream & Share

Record and broadcast your event in real time—on site, fully remote or hybrid. Our solutions support live streaming, recording, and content archiving, so your message reaches every intended audience, wherever they are.

Operator-controlled camera tracking follows speakers when they speak, allowing remote viewers to stay fully engaged with natural, dynamic visuals.

Conferences & Silent Events

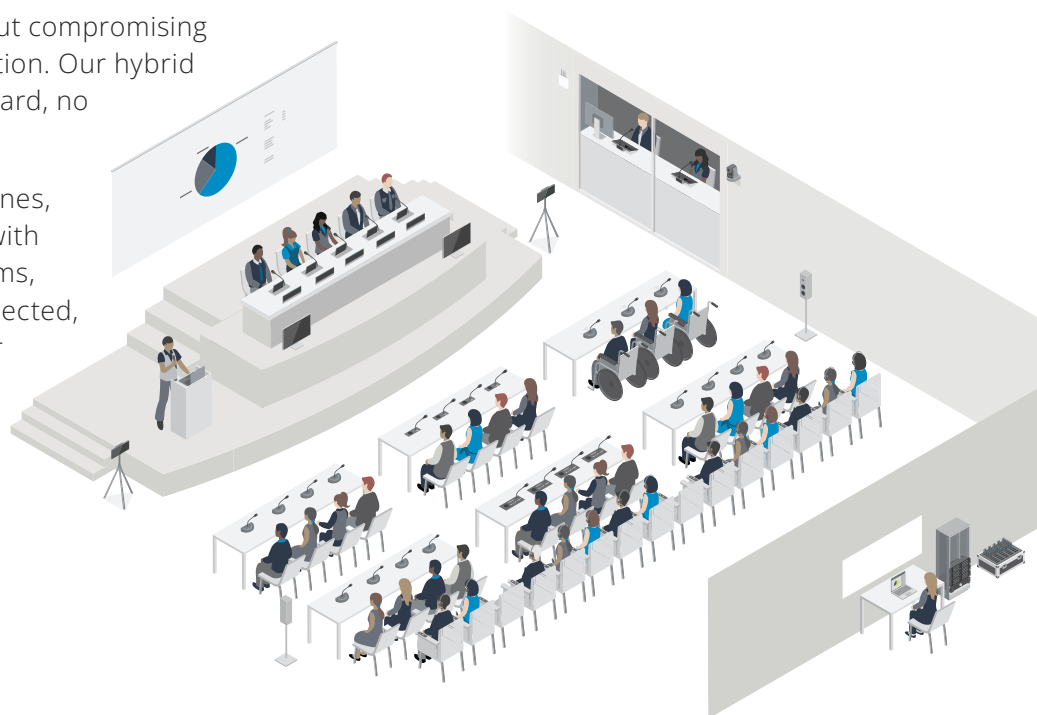

Silent conferences, multilingual breakout sessions, and mobile audience formats require flawless coordination. We provide tailored AV setups to ensure clarity and interaction—without noise or confusion.

Attendees can tune in to their preferred language, session, or speaker using wireless receivers, ensuring everyone hears what's relevant to them—clearly and without interruption.

Hybrid Meeting Support

Connect in-room participants with remote speakers and audiences—without compromising on sound, structure, or interaction. Our hybrid setups ensure every voice is heard, no matter the location.

We combine in-room microphones, cameras, and streaming tools with video platforms like Zoom, Teams, or Webex. Everyone stays connected, whether attending physically or remotely.

Multilingual Meetings

Bridge language gaps with confidence

Real-Time Language Access

We enable seamless communication across languages using professional simultaneous interpretation systems. Participants listen in their preferred language and stay fully engaged throughout.

One language or twenty? We configure the right mix of receivers, transmitters, and booth positions—onsite or remote—to meet your event's requirements.

Interpreter Booths & Gear

Our ISO-compliant interpreter booths, consoles, and wireless headsets meet the highest standards. Every detail is designed for clarity, comfort, and uninterrupted translation.

Interpretation channels are fully integrated with our conference microphones, streaming tools, and recording systems—keeping your setup compact and cohesive.

Simultaneous Interpretation

Simultaneous interpretation allows participants to listen to a live translation of a speaker's words in real time—without delays or interruptions.

An interpreter listens to the speaker through a headset and instantly translates the message into another language, which is transmitted to the audience via wireless receivers and headsets.

Experienced Interpreters

Our team includes a trusted network of professional interpreters with years of experience in high-level meetings, conferences, and international events.

From EU institutions and corporate boardrooms to NGO summits and medical congresses, our interpreters are well-versed in diverse terminology and protocols.

I just wanted to thank you and your hard-working team for doing such an excellent job in Ghent. The feedback from English, French and Dutch delegates was 100% positive and complimentary. Your team were an important part of making the day the success it was, so please pass our thanks on to everyone who was involved!

JANET MERZA, THE HEALTH AND EUROPE CENTRE

Interpretation Formats Compared

	On site	Remote	Online-Only
Where?	Interpreters at venue In booths	Interpreters off-site duvall hub or at home	Fully virtual duvall hub or at home
Best For	Formal High-profile meetings	Hybrid set-ups	Webinars, Livestreams Online meetings
Pros	<ul style="list-style-type: none"> ⊕ Best audio quality ⊕ Direct contact 	<ul style="list-style-type: none"> ⊕ Flexible staffing ⊕ Less travel ⊕ Works with hybrid 	<ul style="list-style-type: none"> ⊕ No hardware needed ⊕ Fast set-up ⊕ Cost-effective
Cons	<ul style="list-style-type: none"> ⊖ Requires space ⊖ Increased logistics 	<ul style="list-style-type: none"> ⊖ Internet-dependent ⊖ Limited visual cues ⊖ More complexity 	<ul style="list-style-type: none"> ⊖ Platform limits ⊖ Audio quality loss ⊖ Less interpreter control

Tour Guide Systems

Crystal-clear audio for groups on the move

Reliable in Any Environment

From production facilities to cultural sites and outdoor events, our wireless tour systems ensure crystal-clear audio for every participant—no matter the noise level or group size.

Choose between one-way or two-way audio, multiple channels, and setups that support up to 32 groups. Compact receivers with long battery life make the experience easy and comfortable for everyone.

Translation for Small Groups

Tour Guide Systems are perfect for small meetings that require simultaneous translation.

With the interpreter sitting among the participants, everyone can follow the conversation through personal receivers.

Ready-to-Use Sets

We provide complete tour guide sets that are pre-configured, fully charged, and ready for immediate use. Each set includes lightweight receivers, transmitters, headsets, and charging trays—delivered in custom cases for easy transport and setup.

SENNHEISER TOURGUIDE

For simpler setups or smaller tours, the Sennheiser Tourguide 2020 remains a reliable and efficient solution. It's ideal for small meetings and company visits where participants need to hear the guide clearly, even in noisy environments.

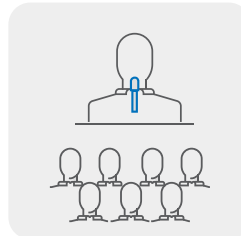

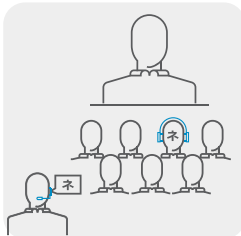

Televic Unite - All in one communication system

Meetings, gatherings and events are becoming more interactive than before and require the necessary equipment to ensure that everyone hears and is being heard clearly. Unite is a **Digital Wireless Communication System** designed to allow people to effortlessly speak, listen and interact with each other.

Artificial Intelligence

AI INTERPRETATION

AI-driven voice translation tools are rapidly improving and can support **real-time multilingual interaction** in certain settings. These systems convert spoken language into another language on the fly—ideal for informal meetings, breakout sessions, or content **where nuance is less critical**.

While not a replacement for professional interpreters in high-stakes environments, AI interpretation can be a cost-effective addition for **supplementary language support**. duvall helps integrate these solutions with your AV setup—on site, hybrid, or online.

AI LIVE CAPTIONS

AI-powered speech-to-text solutions offer **real-time subtitling** with high accuracy for many languages. Perfect for accessibility, multilingual audiences, or online viewers, these tools display live captions directly on screens or streams.

We use leading platforms and custom integrations to deliver smooth, delay-free subtitles—whether in one language or auto-translated into several. Subtitling can be added to meetings, conferences, or livestreams with minimal setup.

↔ AI vs Human Interpretation

	Human Interpretation	AI Interpretation
Accuracy	⊕ High, handles complex dialogue	⊖ Good, varies by language/speaker
Context & Nuance	⊕ Captures tone, emotion, and intent	⊖ May miss cultural or emotional cues
Languages	⊕ Broad range with native fluency	⊖ Limited to supported languages
Best For	High-level meetings, diplomacy, legal, sensitive topics	Informal sessions, large-scale multilingual events, internal use
Setup	Requires booths, hardware & interpreters	Software-based, minimal equipment
Flexibility	⊕ Dynamic response to speaker changes	⊖ Less adaptable to accents or unclear speech

⤴ Combine the best of both worlds

Use human interpreters for keynotes, panel discussions, and high-stakes meetings—where nuance and accuracy are critical.

For breakout sessions, informal discussions, or parallel tracks, AI interpretation can offer a scalable and cost-efficient solution.

We'll help you strike the right balance for your event.

Interactive Voting Systems

Get your audience involved, make smarter decisions

Voting Drives Dialogue

Interactive voting brings focus and energy to any meeting. Whether you're gauging opinions, making decisions, or running a quiz, our voting solutions give every participant a voice. With instant results and flexible voting formats, you can steer discussions in real-time and turn passive listeners into active contributors.

Our Televic conference systems come with built-in voting features for formal settings like council meetings or assemblies, offering seamless integration with microphone and interpretation functions. But when you need to go further – with quizzes, priority rankings, statistical comparisons, or voting in larger groups – we deploy IVS (Interactive Voting System) as a dedicated and scalable solution.

Applications

 Congresses & Assemblies

 Shareholder meetings

 Employee or member surveys

 City council or committee sessions

 Quizzes and games

SIMPLE, RELIABLE KEYPADS

Each participant gets a compact keypad to vote on questions shown on screen. Choices range from 1 to 10, and votes are submitted within a set time limit or manually ended by the moderator.

Dry Hire Conference Technology for AV Companies

Premium gear. No strings attached.

Sometimes you don't need a full crew or onsite support. As an AV partner, you just need reliable conferencing equipment, fast.

With duvall dry hire, you can cross-hire premium conference technology exactly when your project needs it. You choose the kit, and we make sure it's fully prepared and ready to perform - whether we deliver it to site or you collect it from duvall.

Request a quote like an online shop

Browse our dry-hire range, add the products you need to your basket, and submit a non-binding quote request via checkout. We confirm availability and send a tailored quotation—free of charge and without obligation.

State-of-the-art equipment

Professional standards for clarity, reliability, and performance.

Checked and tested - every time

Every component is inspected by our technicians before dispatch. Every component is inspected by our technicians before dispatch.

Fully configured, ready to use

Complete sets delivered charged and pre-configured (transmitters, receivers, headsets, chargers).

Expert advice when you need it

Not sure what to rent? Our specialists help you build the right equipment package for your room setup, audience size, and format.

Need advice on the right configuration?

We're happy to help you choose the right setup for your venue, audience size, and format – so your team can focus on the event.

Project Coordination

From First Contact to Final Applause

One Point of Contact

From the very first consultation to the final follow-up, duvall ensures you work with a dedicated project manager who understands your vision and the technical requirements of your event. This central coordination ensures smooth communication, streamlined planning, and fast responses throughout the process.

Tailored to Your Venue

Every event location is different – that’s why we never take a one-size-fits-all approach. We conduct site visits, liaise with venue teams, and adapt our setup to the specific acoustics, power layouts, internet connectivity, and spatial requirements of your space.

Fully Integrated Support

We provide more than just the AV setup. Our coordination covers everything from conference equipment and interpreters to staging, lighting, and signage. We align all moving parts into one cohesive experience, so you don’t have to manage multiple suppliers.

Tested, Not Assumed

We believe preparation is everything. That’s why we run on-site tests, dry runs, and simulations well before showtime. Equipment is double-checked, redundancies are in place, and every element is ready to perform under pressure – because we plan for the unexpected.

Why Work With duvall?

We don't just deliver equipment – we ensure your meeting or conference runs flawlessly.

We are a service-oriented company. Our business is to actively contribute to a successful conference or a perfect meeting. We seek to achieve this through our focus on quality in four areas:

-  Our equipment: we use the best and most appropriate technology.
-  Our staff: professional and qualified workers who are discreet and service-oriented.
-  Our service: we are committed to delivering a perfect result centred around the user.
-  Our corporate values: focus on sustainability and transparency.

Tailored to Your Needs

Every event is unique, and so is our approach. We work closely with you to understand your goals and provide interpreters who meet your specific requirements. With duvall, you can ensure every voice is heard and every word is understood.
